All the Features You Need at a Price You Can Afford

Since 1987, the quality standards of Americomp have been unsurpassed. Americomp systems remain the affordable choice in today’s marketplace, offering the same long term dependable performance that has become synonymous with the Americomp name.

AV325 Integrated Standard Frequency System

Simplified Operator Control Panel
The maximum generator output is 300 mA at 125 kV and features an easy to use control panel resulting in minimal retakes. Two mA stations provide fast exposure for small and large tube filaments. Eighteen time stations, as low as 1/120th for precise time resolution. Major and minor kV selectors provide resolution within one kV of desired value. Completely sealed from animal fluids.

Tubestand Mounted Digital Display
Important exposure information is prominently displayed on the system tubestand, easily within the operator’s line of sight. Special protective covers eliminate any possible animal damage.

Convenient Light Beam Collimator

Simplex Cassette Tray
Each system includes a Simplex cassette tray. There are no moving parts, so it’s twice as easy to load. Accepts 8” x 10”, 10” x 12” and 14” x 17” cassettes in the long or cross direction.

Optional Features
- Table-top extension (either end) adds 12” of table length for very large animals or standing lateral views.
- Tie-down brackets offer non-manual restraint capabilities.
- Out-of-room exposure switch allows you to leave the table when taking exposures.
